N HUSSAIN AHAMED

OBJECTIVE

Information Science undergraduate with hands-on experience developing MERN Stack applications and integrating AI-powered features. Passionate about building scalable web applications and leveraging intelligent automation to solve real-world software engineering challenges.

EDUCATION

B.E. – Information Science & Engineering 2027
RNS Institute of Technology, Bengaluru, Visvesvaraya Technological University
CGPA: 9.12/10 • Full-time

PUC (12th) 2023
Anantha PU College, Arsikere, Karnataka PU Board
Percentage: 91% • Full-time

10th 2021
Anantha International School, Arsikere, CISCE
Percentage: 90.30% • Full-time

SKILLS

Programming Languages	Java, JavaScript, C
Frontend	React.js, HTML5, CSS3
Backend	Node.js, Express.js
Database	MongoDB, SQL
AI & APIs	Google Gemini API, REST APIs
Tools	Git, GitHub, VS Code, Postman
Core Subjects	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

PROJECTS

SummariVideo – AI Video Note Generator *React, Node.js, Express, MongoDB, Gemini 2.5 Flash, FFmpeg*

- Built a full-stack web application that converts YouTube videos and uploaded media into structured, translated notes using Google Gemini's multimodal API, classifying videos into 13 categories.
- Implemented audio extraction and compression using FFmpeg and yt-dlp, reducing file sizes by approximately 80% before LLM processing.
- Designed exponential-backoff retries for Gemini API calls and built Express.js REST APIs for CRUD operations, progress tracking, and PDF export.

Smart Donation System with Barcode Tracking *React.js, Node.js, Express.js, MySQL, REST APIs, JWT*

- Built a full-stack, multi-category donation management system featuring dynamic barcode/UID generation and live shipment tracking (Received → Dispatched → Delivered).
- Implemented JWT authentication, bcrypt password hashing, and Role-Based Access Control (RBAC) securing User and Admin dashboards.
- Architected a normalized MySQL database (10+ tables with indexing) and developed 15+ RESTful APIs for real-time inventory and logistics.
